

# Teaching Subtraction: Egg Method

# Teaching Subtraction: Egg Method

## Teaching Notes

Place the total number of items (beans or counters) in the white part of the egg shape.

Move the amount that you're taking away one at a time into the yellow/yolk part of the egg.

All at once, move the pile that is in the yellow section out of the egg (following the red arrow).

Count the amount that is left in the egg shape to find the answer to the subtraction problem.
